

PHILIPS

sense and simplicity

World Sustainable Energy Days

Harry Verhaar

February 26, 2009

**How better lighting can contribute
to reduced CO2 emissions**

**Less energy waste by
new technologies**

**Energy saving opportunities
are available everywhere**

A nighttime photograph of Philadelphia City Hall, the central focus, illuminated with bright white lights. The surrounding buildings are lit up with vibrant blue lights, creating a dramatic urban scene. The street is visible with traffic lights and streetlights, and the sky is dark. The text is overlaid in the center of the image.

Insights in private & public needs lead to action
The lighting industry will support

Banning of outdated lighting technologies

Energy & well-being benefits
by modern lighting systems

Stimulate the switch to energy efficient lighting

**Continue the encouragement of
efficient lighting technologies**
